

MUHAMMAD ABDULLAH

A I - E N G I N E E R

PROFESSIONAL SUMMARY

I am a Bachelor of Science in Artificial Intelligence student with practical experience in Artificial Intelligence, Machine Learning, Natural Language Processing, and Computer Vision. I have developed object detection models using YOLOv8 and implemented various machine learning solutions for real-world applications. With strong problem-solving skills and a passion for research, I am eager to contribute to innovative projects and pursue advanced learning opportunities in Artificial Intelligence.

📍 **ADDRESS:** Faiz Colony, Street #3, Sadiqabad (Pakistan)

EDUCATION :

Bachelor of Science in Artificial Intelligence | 05/09/2022 – Current

Khawaja Fareed University of Engineering & Information Technology

- City : Rahim Yar Khan
- Country : Pakistan
- Website : <https://www.kfueit.edu.pk/>

PROJECTS :

AI-based Computer Assistant

University Project :

- Built an intelligent assistant using Natural Language Processing to process and respond to voice commands.
- Enabled tasks like reminders, Q&A, weather forecasting, recommendations, and system control.
- Applied advanced NLP methods (NER, POS tagging, semantic analysis, intent classification) for accurate multi-turn conversations.
- Integrated speech recognition, text-to-speech, and Python-based NLP libraries for seamless interaction.

AI-Powered Internship Assistant System

Ezitech Company Project :

- Developed a web-based intelligent assistant to automate the entire internship process, including student onboarding, AI-driven interviews, evaluation, task assignment, and certification.
- Designed an AI interview bot (voice & chat) capable of conducting category-based dynamic interviews in English and Urdu using NLP and speech technologies.
- Integrated Google Meet/Zoom APIs for live interviews with support for parallel sessions.
- Implemented YOLOv8-based face detection to verify candidate authenticity .
- Automated internship categorization and task assignment with grading system.
- Added attendance monitoring, performance evaluation, and auto-generation of certificates & internship reports.
- Technologies: Python (Flask/FastAPI), OpenCV, YOLOv8, Hugging Face Transformers, LangChain, Streamlit/ReactJS, Google/Zoom APIs, MongoDB, AWS/Firebase

Multi-Language Real-Time Phishing & Fraud Detection API

Internship Project :

- Built a real-time API to detect phishing, fraud, scams, and PII leaks in text, screenshots, and audio across multiple languages (English, Urdu, Hindi, Arabic) using OCR, STT, and ML classifiers.
- Developed a Multilingual NER model for auto-redaction of sensitive data (CNIC, OTP, IBAN, emails, passwords) and an ML + rule-based URL de-obfuscator to counter adversarial tricks.
- Delivered explainable outputs with policy actions (quarantine, redaction, webhooks, auto-reply) and deployed with Python, Hugging Face, LibreTranslate, PhishTank API, Tesseract, Vosk, Streamlit/Flask.

Multi-Language Real-Time Sarcasm & Hate Speech Detection API

Internship Project :

- Developed a real-time API to detect sarcasm, hate speech, and toxicity across multiple languages (English, Urdu, Hindi, Arabic) using transformer-based ML models.
- Integrated language detection, translation, and NLP pipelines with sarcasm classification, hate-speech categorization, and toxicity scoring.
- Built a Streamlit/Flask dashboard & JSON API for live chat/message monitoring with explainable, color-coded outputs.

EXPERIENCE :

Ezitech Institute – Rawalpindi, Pakistan

website: <https://ezitech.org/>

Machine Learning & AI Intern | 13, Jun 2025 – 14, Sep 2025

- Worked on Multi-Language Real-Time Phishing, Hate Speech & Sarcasm Detection + Auto-Redaction & AI Voice Cloning with TTS API.
- Performed data preprocessing, model implementation, and evaluation using Python, Scikit-learn, TensorFlow, NumPy, and Pandas.
- Delivered reliable results through ML algorithms (Regression, Decision Trees, KNN) with performance assessment via accuracy scores and confusion matrices.

EBuiltinsoft – Rahim yar Khan, Pakistan

website: <https://builtinsoft.com/>

Python Developer Intern | 10, May 2025 – 19, July 2024

- Developed and maintained Python-based APIs for real-time data processing and system automation.
- Utilized Python libraries (NumPy, Pandas, Flask, TensorFlow, Scikit-learn) to implement business logic and ensure system reliability.
- Performed testing, debugging, and optimization to improve code efficiency and application performance.

CodeAlpha – Lucknow, Uttar Pradesh

website: <https://builtinsoft.com/>

Data Analyst | 29, March 2025 – 29, May 2025

- Collected, cleaned, and transformed datasets to ensure accuracy and consistency for analysis.
- Applied statistical techniques and visualization tools (Pandas, NumPy, Matplotlib, Seaborn) to identify trends and patterns.
- Generated reports and actionable insights to support decision-making and improve project outcomes.

COURSES AND CERTIFICATIONS:

- IBM Data Science Professional Certificate – [Coursera](#)
 - Advanced Python Specialization – [NAVTTC University](#)
 - Microsoft Azure AI Advanced – [Coursera](#)
 - Interactive Workshop on Python – [ACM \(2-Days\)](#)
 - The Web Ecosystem – [GDSC \(1-Day Workshop\)](#)
 - Emerging Trends in AI & Cybersecurity – [\(2 Days workshop in University\)](#)
-

NETWORKS AND MEMBERSHIPS:

Association for Computing Machinery (ACM)

- Member of ACM, participating in workshops and events related to computing, programming, and emerging technologies.

Link: <https://www.acm.org>

Google Developer Student Club (GDSC)

- Member engaged in developer workshops, web ecosystem events, and AI/technology initiatives.

Link: <https://developers.google.com>

PFTP – Professional Freelancing Training Program

- Participant in specialized programs including Cybersecurity, Ethical Hacking, and professional freelancing skills.

VOLUNTEERING:

[01/10/2023 – Current]

KK Blood Donation to Thalassemia Patients

- Collaborated with the Blood Donor Society to organize blood donation drives for thalassemia patients.
- Raised awareness about thalassemia through outreach and engagement activities.

[01/10/2024 – Current]

DS-AI Fast Society

- University-based student society focused on Data Science and Artificial Intelligence
- Organizes workshops, seminars, and hackathons to enhance practical skills
- Promotes research and innovation in AI, machine learning, and data-driven technologies

NOTABLE AWARDS :

Dean's List, University, 2024–2025

- Recognized for outstanding academic performance during the 2024–2025 academic year
 - Achieved a consistently excelled in coursework
 - Demonstrates commitment, dedication, and excellence in studies
 - Reflects strong work ethic and academic discipline
-
