

MUHAMMAD ABDULLAH

AI ENGINEER

Sadiqabad, Pakistan | abdullah2507abdullah2507@gmail.com | Linkdin: [Click on it](#)

SUMMARY

Artificial Intelligence student with hands-on experience in Machine Learning, Natural Language Processing, and Computer Vision. Skilled in developing AI-based systems including NLP assistants, object detection models using YOLOv8, and real-time ML APIs. Strong problem-solving mindset with interest in building scalable AI solutions and research-driven applications.

SKILLS

Programming: Python

Frameworks & Tools: Flask, FastAPI, Streamlit, ReactJS

Libraries: TensorFlow, Scikit-learn, NumPy, Pandas, Hugging Face Transformers, LangChain

Technologies: YOLOv8, OpenCV, MongoDB, AWS, Firebase

Core Concepts: Machine Learning, Deep Learning, NLP, Computer Vision, NER, POS Tagging, Model Evaluation, Data Preprocessing

EDUCATION

Bachelor of Science in Artificial Intelligence

Khawaja Fareed University of Engineering & Information Technology

- Sep 2022 – June 2026

PROFESSIONAL EXPERIENCE

Artificial Intelligence & Machine Learning Intern

Jun 2025 – Sep 2025

Ezitech Institute, Rawalpindi

- Worked on phishing detection, hate speech, and sarcasm detection systems
- Implemented ML models using TensorFlow and Scikit-learn
- Performed data preprocessing, evaluation, and optimization

Python Developer Intern

Jul 2024 – May 2025

EBuiltinsoft, Rahim Yar Khan

- Developed Python-based APIs for automation and data processing
- Optimized code performance and improved system reliability

PROJECTS

InternBuddy-Internship Assistant System

Final Year Project

- Built AI-based internship management system with automated onboarding, evaluation, and certification
- Developed AI proctoring system for MCQs, written, and oral tests
- Implemented anti-cheating features (eye tracking, head movement, noise detection)
- Integrated performance tracking, grading, and report generation

AI-based Computer Assistant

- Developed an NLP-based voice assistant capable of handling reminders, Q&A, weather updates, and system control
- Implemented NER, POS tagging, semantic analysis, and intent classification
- Integrated speech recognition and text-to-speech systems

Phishing & Fraud Detection API

- Developed multi-language detection system using OCR, STT, and ML models
- Built auto-redaction system for sensitive data (CNIC, OTP, IBAN)
- Implemented URL de-obfuscation and explainable AI outputs

Sarcasm & Hate Speech Detection API

- Built transformer-based multi-language classification system
- Implemented toxicity scoring and real-time monitoring dashboard

AI Resume Analyzer & Job Matcher

- Built NLP-based system to analyze resumes and match with relevant jobs
- Implemented resume parsing using NER and transformer models
- Developed ATS score prediction and job recommendation engine
- Provided skill gap analysis and improvement suggestions

CERTIFICATIONS

- IBM Data Science Professional Certificate (Coursera)
- Advanced Python Specialization (NAVTTTC)
- Microsoft Azure AI (Coursera)
- Machine Learning (Stanford Online Coursera)
- AI for Autonomous Vehicles and Robotics (University of Michigan Coursera)
- Google Advanced Data Analytics (Coursera)
- Google Advanced Data Analytics Certificate (Coursera)
- Microsoft Azure for AI and Machine Learning (Coursera)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate (Oracle University Coursera)

LANGUAGES

- English
- Urdu
- Punjabi

VOLUNTEERING

- Blood Donation Campaign for Thalassemia Patients
- DS-AI Society (Workshops, Seminars, Hackathons)
